5. Title

The Diseases of Animals (Approved Disinfectants) (Amendment)
Order 1996.

6. Products Concerned

Disinfectants.

7. Notification Under Another Act

-

8. Main Content

A. This order amends the list of approved disinfectants for the control of notifiable animal diseases in Great Britain.

B. The United Kingdom would like to be informed by other Member States of their own standards or regulations offering an equivalent level of safety and security.

9. Brief Statement of Grounds

EC animal health legislation (including Directive 90/242 dealing with the eradication of brucellosis in sheep and goats and Directive 85/511 dealing with Foot and Mouth disease) include the requirements that disinfectants used in connection with disease control procedures, and their concentrations, are authorised or officially approved. This is implemented in Great Britain by the Diseases of Animals (Approval of Disinfectants) Order 1978 (as amended) which, in view of the importance that effective disinfection plays in successful disease control arrangements, extends the principle to certain other notifiable diseases not covered by common EC disease control arrangements.

An approved disinfectant and its concentrations must be listed in the above Order before they can be marketed and used as a Ministry approved disinfectant. The draft regulation under notification, seeks to amend that list by adding the names of products which have been approved by the Ministry and making other relevant amendments. Such

amendments are usually made at six monthly intervals.
