5. Title

Order on the treatment of giblets of poultry with ionising
rays.

6. Products Concerned

Giblets of poultry

7. Notification Under Another Act

-

8. Main Content

This text specifies the conditions under which giblets of
poultry can be treated using ionising rays. It specifies the
minimum and maximum doses of treatment, defines the
conditions
for official inspections and delimits the regulations in
respect of the circulation of the products in question.

9. Brief Statement of Grounds

In spite of the efforts made in respect of hygiene with
regard to raising, slaughtering and processing, the

contamination of poultry and poultry-based products by pathogenic microorganisms, particularly salmonella, continues to pose problems. Ionisation treatment, which is associated with strict hygienic conditions, is capable of meeting the aim of eliminating pathogenic bacteria (salmonella, etc.).
