Partial transposition of Council Directive 2013/59/EURATOM laying down basic safety standards for protection against the dangers arising from exposure to ionising radiation, and repealing Directives 89/618/Euratom, 90/641/Euratom, 96/29/Euratom, 97/43/Euratom and 2003/122/Euratom. This Directive requires that Member States establish national reference levels for radon concentrations in enclosed areas and adopt appropriate measures to limit radon penetration in buildings.

The revision of Basic Document DB-HE 'Energy Saving' introduces amendments to the structure of the basic requirements to adapt them to European legislation, revising the minimum energy efficiency levels applicable to buildings and updating the definition of nearly-zero energy buildings.

#### **9. Brief Statement of Grounds**

Therefore, it is necessary to amend Part I of the Technical Building Code to include the basic requirement on protection from radon in enclosed areas of buildings deriving from Council Directive 2013/59/EURATOM as well as to incorporate Section HS6 'Protection against radon gas' in Basic Document DB-HS 'Health', which implements the requirement.

A new revision of Basic Document DB-HE 'Energy Saving' is necessary in fulfilment of Directive 2010/31/EU of 19 May 2010.
