5. Title

Ministerial Order establishing State metrological control of pressure gauges with electronic components for car tyres.

6. Products Concerned

Pressure gauges with electronic components for cars.

7. Notification Under Another Act

-

8. Main Content

The aim of the present Order is to regulate stages a), b), c) and d) of the metrological control of pressure gauges with electronic components for car tyres not included in the scope of the Order of 28 December 1988 which regulated the State metrological control of pressure gauges for cars.

9. Brief Statement of Grounds

The need to establish metrological controls seems clear in respect of the monitoring, discipline and reporting of irregularities observed in these instruments which are in public use and on which the safety of road traffic and car users depend, since in any other process or administrative action the principle of regulated activity prevails, so consequently it is evident that the instruments which measure

tyre pressures must be instruments subject to a prior control of their manufacture and periodic control when in service.
