5. Title

Order setting end-of-waste criteria for used-oil distillation residues, for use as bitumen plasticisers in the manufacture of waterproof roofing membranes

6. Products Concerned

Used-oil distillation residues, for use as bitumen plasticisers in the manufacture of waterproof roofing membranes.

7. Notification Under Another Act

-

8. Main Content

This Order defines the criteria which, if met, will permit operators of installations classified for environmental protection under Article R. 511-9 of the Environmental Code and authorised under heading 2770 of the nomenclature of installations classified for environmental protection, to declassify used-oil distillation residues as waste, for use as bitumen plasticisers in the manufacture of waterproof roofing membranes. The recovery operation consists in refining mineral or synthetic oils via a vacuum distillation process in order to obtain a distillation residue. The restriction criteria applicable to the input waste and to the quality and monitoring of used-oil distillation residues for certain components are set out in Annex I in order to guarantee that the envisaged use has no environmental or health impact.

9. Brief Statement of Grounds

This Order enables the installations mentioned in Article 2 of this Order, by way of a voluntary process, to declassify used-oil distillation residues as waste so that they may be used in waterproof roofing membranes, subject to compliance with strict quality criteria. These criteria notably include compliance with technical characteristics and concentration limit values for certain components, according to the measurement standards mentioned in the Order. This will help promote the development of waste recycling, a Community objective.

10. Reference Documents - Basic Texts

No basic text(s) available.

11. Invocation of the Emergency Procedure

No

12. Grounds for the Emergency

-

13. Confidentiality

No

14. Fiscal measures

No

15. Impact assessment

-

16. TBT and SPS aspects

TBT aspect

No - the draft has no significant impact on international trade.

SPS aspect

No - the draft is neither a sanitary nor phytosanitary measure.
