**4. Notification Number**

92/0067/F

**5. Title**

Decision by the Minister responsible for industry and foreign trade NoEXP92- on the maximum permissible values for the tolerances on the theoretical proportions of components of explosive substances.

**6. Products Concerned**

Explosive substances

**7. Notification Under Another Act**

-

**8. Main Content**

Laying down the maximum permissible values for the tolerances on the theoretical proportions of the components of explosive substances subject to mandatory compliance with an approved model. The explosive substances for which the effective proportions of components lie outside the tolerance range adopted when the substances were approved- tolerances which themselves in the absence of any specific decision must not exceed the maximum values set out in this Decision, are considered not to conform to the approved model. These maximum values are based on experience of the tolerances which may be met during industrial production and on the variations in the properties of explosive substances (according to the effective content of their components) which are considered acceptable without having to consider that one is dealing with a different product.

**9. Brief Statement of Grounds**

Updating of Ministerial Decision NoEXP73-01 of 13September1973 in the light of experience and the emergence of new families of explosive substances and new production processes (mobile machinery). This updating is transposed into a general rule by making the requirements of the Decision of 13September1973 more flexible.
