8. Main Content

Amendment of the previous text on acidity limits for pasta, substituting certain titles.

Amendment of the method of analysis set out in the Annex to the pure food regulation.

Elimination of references to standards since replaced by others.

9. Brief Statement of Grounds

Experience gained in applying the pure food regulation on the production, movement and trading of pasta has shown that the parameter 'fat acidity' needs to be replaced by 'product acidity', expressed in degrees of 'dry substance', which means amending the values of the said parameter. These amendments entail the amendment of the methods of analysis set out in the Annex to the said pure food regulation.
