8. Main Content

This concerns the technical adaptation of certain requirements in industrial installations in the edible oil and fat sectors, with the aim of establishing the same conditions in these industries as in the other Community countries involved in these activities.

9. Brief Statement of Grounds

Given that there currently exist satisfactory control mechanisms which ensure adequate supervision of the activities, without the need to impose requirements disproportionate to the desired aims, it is therefore necessary to amend certain precepts of current legislation on this matter.
