**2. Member State**

United Kingdom.

**3. Department Responsible**

Department of Trade and Industry: Standards and Technical Regulations Directorate

**3. Originating Department**

Ministry of Agriculture, Fisheries and Food

**4. Notification Number**

2000/698/UK - COOA

#### **5. Title**

The Diseases of Animals (Approved Disinfectants) (Amendment) (England) Order 2000

#### **6. Products Concerned**

Disinfectants approved by MAFF for statutory use for disease control.

#### **7. Notification Under Another Act**

-

#### **8. Main Content**

The draft amending Order will remove 7 disinfectants from the statutory list of disinfectants approved for use against TB contained in the Diseases of Animals (Approved Disinfectants) Order 1978. In addition, the draft Order will add one disinfectant to the list of those approved for TB and other categories, delete two disinfectants from the list of disinfectants approved for swine vesicular disease purposes and amend the dilution rate at which one disinfectant must be used for diseases of poultry.

The UK will fulfil its obligation under Article 12 of Directive 98/34/EC (as amended) when these Regulations are officially published.

#### **9. Brief Statement of Grounds**

Effective disinfection plays an essential role in the control of animal disease in England and the disinfectants approved for use for statutory purposes are listed in the Diseases of Animals (Approved Disinfectants) Order 1978. During check testing for statutory use, some disinfectants were found no longer to be fully effective and must be removed from the approved list as soon as possible.

#### **10. Reference Documents - Basic Texts**

The draft Order

See Notification 98/0483/UK

The disinfectants concerned have failed the tests for statutory approval. No risk assessment is attached.

#### **11. Invocation of the Emergency Procedure**

Yes

#### **12. Grounds for the Emergency**

The disinfectants concerned have been found not to be effective. Control of bovine TB is of significant importance in parts of England and it is not acceptable to have disinfectants officially authorised that are now known not to meet the necessary standards. Infected premises which are not effectively disinfected may result in re-infection of stock.

**13. Confidentiality**

No

**14. Fiscal measures**

No

David O'Sullivan
