8. Main Content

The purpose of this decree is to regulate the procedure for the direct granting of subsidies under the 'Incentive plan for alternative energy vehicles (AEV Plan 2018)', which involves encouraging the purchase in Spain of vehicles powered by alternative energy sources instead of conventional fuels, thereby promoting sustainability within the transport sector, reducing CO₂ and other pollutant emissions, mitigating climate change and improving air quality, as well as diversifying energy sources in the transport sector and reducing dependency on oil.

To this end, the subsidies referred to in this decree shall be granted for the purchase in Spain of vehicles powered by alternative energy sources (electricity, hydrogen, LPG, CNG and LNG).

9. Brief Statement of Grounds

It is considered necessary to notify the European Commission of the draft Royal Decree regulating the direct granting of aid for the purchase of alternative energy vehicles in 2018 (AEV Plan 2018), since it is a financial measure considered as a de facto technical regulation, and is included under the definition for 'technical regulation' in Article 1(f) of Directive (EU) 2015/1535 of the European Parliament and of the Council of 9 September 2015 laying down a procedure for the provision of information in the field of technical regulations and of rules on Information Society services (formerly Directive 98/34/EC). Since it is considered a financial measure, it is exempt from meeting the three-month standstill period referred to in Article 6(1) of said Directive.

10. Reference Documents - Basic Texts
