5. Title

Order concerning specifications for super unleaded fuel

6. Products Concerned

-

7. Notification Under Another Act

-

8. Main Content

Definition of the administrative specifications for super unleaded fuel following the adoption of a European standard for this product by the European Committee for Standardization.

9. Brief Statement of Grounds

The French government wishes to replace the current regulation on super unleaded fuel (amended order of 29 October 1987) in order to take into account the adoption by the European Committee for Standardization (16 March 1993) of the standard EN 228 which defines all the technical characteristics of the product. The text specifies that super unleaded fuel sold in France must conform to this standard or any other equivalent standard, and indicates the categories of characteristics which are dependent on climatic conditions, as well as various provisions relating to consumer protection and information which are contained in the previous text.
