4. Notification Number

2000/517/UK

5. Title

The Goods Vehicles (Plating and Testing) Regulations 2000

6. Products Concerned

Goods vehicles which are designed or adapted to operate at a weight of between 3,500 kg and 5,500 kg when laden.

7. Notification Under Another Act

-

8. Main Content

The Goods Vehicles (Plating and Testing) Regulations 1988 prescribe requirements for the inspection of goods vehicles over 3,500 kg gross weight. The provisions of (a) The Road Vehicles (Construction and Use) (Amendment No.) Regulations 2000 and (b) The Motor Vehicles (Approval) Regulations 2000, both of which are the subject of concurrent Notifications under Directive 98/34/EC :

(a) enable a goods vehicle designed or adapted to operate at a gross vehicle weight of between 3,500 kg and 5,500 kg to be re-plated to operate at no more than 3,500 kg gross weight provided it belongs to the same family of types for which a single approval has been previously granted without such re-plating; and

(b) bring such vehicles within the scope of single approval.

These amending Regulations exempt goods vehicles that have been re-plated under (a) and singly approved under (b) from the otherwise generally applicable heavy goods vehicle inspection regime.

These regulations do not themselves set standards so do not need to specify equivalents. Full recognition of equivalent EEA single vehicle approval standards is prescribed in the concurrently Notified Motor Vehicles (Approval) Regulations 2000.

9. Brief Statement of Grounds

At present, all goods vehicles over 3,500 kg gross weight are required to undergo national type approval. The proposed changes, collectively, introduce flexibility by enabling vehicles between 3,500 and 5,500 kg to enter service via a simpler single vehicle approval, provided that a vehicle of the same family of types with a gross weight of no more than 3,500 kg has already been singly approved.
