Ministry of Agriculture, Fisheries and Food:Animal Health  
(Disease Control) Division

**4. Notification Number**

97/0170/UK

**5. Title**

The Diseases of Animals (Approved Disinfectants) (Amendment)  
Order 1997.

**6. Products Concerned**

Disinfectants to be used in relation to the control of animal  
disease in Great Britain.

**7. Notification Under Another Act**

-

**8. Main Content**

A. This order amends the list of approved disinfectants for  
the control of animal diseases in Great Britain.

The UK will fulfil its obligation under Article 12 of  
Directive 83/189/EEC (as amended) when these Regulations  
are officially published.

B. The United Kingdom would like to be informed by other  
Member States of their own standards or regulations  
offering an equivalent level of safety and security.

**9. Brief Statement of Grounds**

EC animal health legislation (including Directive 90/242  
dealing with the eradication of brucellosis in sheep and  
goats and Directive 85/511 dealing with Foot and Mouth  
disease) include the requirements that disinfectants used in  
connection with disease control procedures, and their  
concentrations, are authorised or officially approved. This  
is implemented in Great Britain by the Diseases of Animals  
(Approval of Disinfectants) Order 1978 (as amended) which, in  
view of the importance that effective disinfection plays in  
successful disease control arrangements, extends the  
principle to certain other diseases not covered by common EC  
disease control arrangements.

An approved disinfectant and its concentrations must be  
listed in the 1978 Order before they can be marketed and used  
as a Ministry approved disinfectant. The draft regulation  
under notification seeks to amend that list by adding the  
names of products which have been approved by the Ministry  
and making other relevant amendments. Such amendments are

usually made at six monthly intervals.
