5. Title

MPT 1407 - Performance Specifications and Frequency Assignment Criteria for Digital Fixed Radio Relay Equipment and Antennas Operating in the 7425 MHz to 7900 MHz Frequency Band.

6. Products Concerned

Radiocommunications Equipment, Fixed Links.

7. Notification Under Another Act

-

8. Main Content

A. This specification covers the minimum mandatory requirements of fixed link digital transmitters and receivers for use on private radio link systems in the frequency band 7425 MHz to 7900 MHz. These requirements include parameters necessary to ensure compatibility between channels from different sources of equipment on the same route, connected either to separate antennas, or to separate polarisations of the same antenna, and compatibility with the existing radio relay network.

B. The United Kingdom would be pleased to be informed by other Member States of the European Economic Area of their own standards or regulations offering an equivalent level of safety and security.

9. Brief Statement of Grounds

This is a Regulatory Document specifying the minimum equipment parameters necessary for frequency assignment in the UK. There is currently no specific work ongoing within ETSI to standardise the use of these bands, due to the diversity of use and equipment across Europe. This Specification is being updated to include several editorial changes.
