5. Title

Decision 2010-xxxx of the French Telecommunications and Postal Regulator (ARCEP) of xxxxxx 2010 setting out the technical radio frequency usage conditions applicable to radiolocation devices in the 24.05–24.25 GHz band.

6. Products Concerned

Radiolocation devices in the 24.05–24.25 GHz band

7. Notification Under Another Act

-

8. Main Content

The decision is intended to set out the technical radio frequency usage conditions applicable to radiolocation devices in the 24.05–24.25 GHz band.

9. Brief Statement of Grounds

The technical conditions relating to radiolocation devices in the 24.05–24.25 GHz band are as recommended in Annex 6 of Recommendation ERC/REC/70-03 of the European Conference of Postal and Telecommunications Administrations (CEPT) relating to the use of short-range devices, which recommends an equivalent isotropically radiated power (EIRP). However, restrictions shall be imposed on this band in order to prevent harmful interference with the military equipment operated in this frequency band by the French Defence Ministry (a user of the 24.05–24.25 GHz band). Consequently, EIRP shall be limited to 0.1 mW in the 24.10–24.15 GHz subband for all types of signal, and to 20 mW for the entire 24.05–24.25 GHz band for frequency-modulated continuous-wave signals with a minimum sweep speed of 5 MHz per millisecond.

10. Reference Documents - Basic Texts

Reference texts: Recommendation ERC/REC/70-03 of the European Conference of Postal and Telecommunications Administrations relating to the use of short-range devices, and in particular Annex 6 thereof.

11. Invocation of the Emergency Procedure

No

12. Grounds for the Emergency

-

13. Confidentiality

No

14. Fiscal measures

No

15. Impact assessment

-

16. TBT and SPS aspects

TBT relevance

No - The draft does not have a significant effect on international trade.

SPS relevance

No - The draft is not a sanitary or phytosanitary measure.
