5. Title

Ministerial Decree on the State metrological control of work instruments intended for the measurement of exhaust gas emissions from road traffic motor vehicles with spark-ignition engines (petrol)

6. Products Concerned

The proposal affects work instruments intended for the measurement of exhaust gas emissions used in the professional inspection and maintenance of road traffic motor vehicles equipped with spark-ignition engines (petrol), hereinafter referred to as exhaust gas analysers, which are used to determine the fractions of volume of the specific components of exhaust gases, which are gaseous components: carbon monoxide (CO), carbon dioxide (CO₂), oxygen (O₂) and hydrocarbons (HC), pursuant to the standards or regulations that require their use during the professional maintenance of vehicles equipped with petrol engines.

7. Notification Under Another Act

8. Main Content

The notified technical regulation lays down specific regulations from the State metrological control's point of view as laid down by Article 7 of the Metrology Act No 3 of 18 March 1985 for work instruments for the measurement of exhaust gas emissions from road traffic motor vehicles with spark-ignition engines (petrol), thereby ensuring compliance with the applicable legislation relating to the emission of air pollutants.

The draft includes the implementation of the following metrological controls to the aforementioned systems:

- inspection following repair or modification and periodic inspection for those in service.

Key words in the draft:

- Exhaust gas emissions from petrol engines
- Analysis of the emissions
- Legal Metrological Control

9. Brief Statement of Grounds

Its implementation is justified from the point of view of ensuring the control of pollution emitted by vehicles with petrol engines.
