**1. Structured Information Line**

TLX 001 IND- 98 0098 UK- EN ----- 980303 --- ---

**2. Member State**

United Kingdom

**3. Department Responsible**

Department of Trade and Industry: Standards and Technical

Regulations Directorate

**3. Originating Department**

National Weights and Measures Laboratory

**4. Notification Number**

98/0098/UK

**5. Title**

Specification for working standards of capacity - integrated measure.

**6. Products Concerned**

Integrated measures used as working standards of capacity.

**7. Notification Under Another Act**

-

**8. Main Content**

A. The proposed specification updates the existing technical specification for working standards of capacity. It covers integrated measures which are composite measures made up of two components: a brim measures (defined by a weir) and a line measure. They are an amalgamation of the traditional checkpump strike measures and measuring cylinders which would be used separately to determine quantities in excess or in deficiency.

The UK will fulfil its obligation under Article 12 of Directive 83/189/EEC (as amended) when this Specification is published.

B. The United Kingdom would be pleased to be informed by other Member States of the European Economic Area of their own standards or regulations offering an equivalent level of safety and security.

**9. Brief Statement of Grounds**

The proposed specification will update the existing specification for working standards of capacity, principally to permit the use of new materials, alternative capacities and alternative testing methods.

**10. Reference Documents - Basic Texts**

- i. Specification for working standards of capacity - integrated measure.
- ii. No
- iii. No

**11. Invocation of the Emergency Procedure**

No

**12. Grounds for the Emergency**

-

**13. Confidentiality**

No

**14. Fiscal measures**

No
