- Directive 94/62/EC on packaging and packaging waste

8. Main Content

Amendment of Schedule 2 of the Producer Responsibility Obligations (Packaging Waste) 2007. The changes are to introduce new recovery and recycling targets for paper, wood, steel and aluminium and overall recovery and recycling for 2018-20.

9. Brief Statement of Grounds

The existing business targets for 2013-17 were consulted on in 2011 and final targets announced at Budget in March 2012. The targets were set using the best evidence available from business at the time. Targets for glass were revised in 2014, following the publication of the GlassFlow report which showed that that underlying estimates of glass packaging placed on the market used to calculate the targets was inaccurate. In 2015, following the publication of the PlasticFlow report the plastics targets were also amended for 2016-7, along with the establishment of new targets for plastic and glass for 2018-20. The Statutory Instrument came into effect in December 2016.

The business targets for the other materials (paper, steel, aluminium and wood), as well as the overall recovery and recycling targets, expire in 2017. The Packaging Directive requires member states to achieve a specified minimum recycling and recovery rate each year until such time as the Directive is amended. Therefore, without packaging recycling and recovery targets beyond 2017 the UK would be in breach of our Packaging Directive requirements and would not deliver our domestic policy.
