8. Main Content

a) The proposed Regulations would allow for the testing of measures as fit for use for trade by sample if the person submitting them wished, instead of each measure being individually tested. The sampling scheme is based on the scheme in Council Directive 73/362/EEC as amended. Also, to comply with Community law, provision is included for avoiding duplication of test of measures imported from other Member States of the European Union or contracting parties to the European Economic Area.

b) The United Kingdom would be pleased to be informed by other Member States of the European Economic Area of their own standards or regulations offering an equivalent level of safety and security.

9. Brief Statement of Grounds

To introduce statistical testing for these measures of length; and to comply with Community law on the avoidance of duplicate testing.
