8. Main Content

These Regulations would control the sale of mammalian meat and bone meal for use as or in a fertiliser on agricultural land.

Recognition of equivalent standards and testing in notified draft is not provided as it is not applicable in this case.

9. Brief Statement of Grounds

These Regulations were drafted following advice from the Spongiform Encephalopathy Advisory Committee (SEAC) on the measures needed to minimise any theoretical risk to the public from BSE. These measures would ensure that there is no possible chance of ruminant animals having access to land which has been treated with mammalian meat and bone meal.
