8. Main Content

This decision specifies the use of frequencies in the 410-430 MHz and 450-470 MHz bands. It reserves use of the part of the 410-430 MHz band which the Authority allocates, for networks using narrowband PMR/PAMR technologies with channelisation not exceeding 100 kHz, and permits use of the 450-470 MHz band by narrowband or broadband networks.

This draft implements European Decision ECC/DEC(04)06 of 19 March 2004 of the CEPT.

9. Brief Statement of Grounds

This Decision makes, in the 410-430 MHz and 450-470 MHz bands, an appropriate response to all narrowband or broadband PMR/PAMR requirements, and is in line with the most recent decisions of the CEPT, taking account of the requests made in France by the Ministry of the Interior for systems intended to meet public safety requirements.

Furthermore, it permits efficient and appropriate use of the radio spectrum.
