9. Brief Statement of Grounds

Directive 98/83/EC requires Member States to take all necessary measures to fulfil the requirements laid down in Article 10 of this Directive. This draft decree specifies the various requirements for membrane filtration modules and is necessary in order to ensure the safety of products and materials coming into contact with water in facilities used for the production of water intended for human consumption. This draft decree also defines the various requirements in terms of the minimum efficiency levels expected for these devices. These requirements are non-discriminatory as they apply to all involved parties (manufacturers and users, drinking water distribution companies etc).
