5. Title

Order on the audible warning of civilian unmanned aerial vehicles

6. Products Concerned

Civilian unmanned aerial vehicles (drones) weighing more than 800 g

7. Notification Under Another Act

-

8. Main Content

Due to the increase in the number of unlawful flights over sensitive French sites by drones since autumn 2014, two members of the French Parliament tabled a draft law in spring 2016 on improving safety measures when using civilian drones. In particular, this draft followed the Government report to Parliament entitled 'The rise in civilian aerial drones in France: challenges and possible responses from the State', published in October 2015. The law was finally adopted by the French Parliament and enacted on 24 October 2016 (Law No 2016-1428). It imposes new obligations on pilots, owners or manufacturers of civilian unmanned aerial vehicles (UAVs). These are intended to prevent incidents posing a risk to State security, and make pilots accountable.

The aim of the draft Order notified by France to the Member States and the European Commission under Directive (EU) 2015/1535 is to lay down the features (frequency, noise level, signal form) of audible warning devices which civilian unmanned aerial vehicles (UAVs) weighing more than a threshold laid down by way of a Decree must be fitted with pursuant to Article L6214-5 of the Transport Code.

The weight threshold from which this obligation shall apply is laid down by way of a decree at 800 g.

9. Brief Statement of Grounds

This draft order therefore aims to supplement, in order to guarantee public safety and State security, French legislation concerning UAVs, i.e. the Order of 17 December 2015 on the design of civilian UAVs, the conditions for their use and the skills required by those using them, and the Order of 17 December 2015 on the use of airspace by UAVs, as amended on 30 March 2017.

It lays down the features of the audible warning device stipulated in Article L6214-5 of the Transport Code which shall be installed on UAVs registered from 1 July 2018.

However, only drones registered in France pursuant to Article L6111-1 of the Transport Code after 1 July 2018 shall be required to comply with the obligation to have an audible warning.

10. Reference Documents - Basic Texts

Reference(s) to basic text(s): - Article L6214-5 of the Transport Code

11. Invocation of the Emergency Procedure

No

12. Grounds for the Emergency

-
