4. Notification Number

2008/0026/F - B10

5. Title

Order approving the Th-C-E-ex calculation method provided for in the Order on the energy performance of existing buildings with a surface area greater than 1000 m², where they are undergoing significant refurbishment.

6. Products Concerned

The products concerned are the components constituting the building shell, heating systems, domestic hot water supply systems, cooling systems, energy supply systems using a renewable energy source, ventilation systems and lighting systems.

7. Notification Under Another Act

d) Other Directive or Regulation: Directive 2002/91/EC of 16 December 2002 on the energy performance of buildings

8. Main Content

The draft Order on the energy performance of existing buildings with a surface area greater than 1000 m², where they are undergoing significant refurbishment, provides for a restriction on the energy consumption of these existing buildings where they are being refurbished. The draft Order approves the regulatory calculation method that enables the energy consumption of buildings subject to this regulation to be calculated.

9. Brief Statement of Grounds

In view of the importance of reducing energy consumption and of limiting the emission of greenhouse gases, it is necessary to establish a regulation ensuring that an increased level of performance is achieved in the case of significant work on a building. In order to quantify the energy performance of a building, its conventional energy consumption must be able to be estimated. It is therefore necessary to have a calculation method that makes it possible to assess the energy performance of buildings under conventional conditions of use.

10. Reference Documents - Basic Texts

Directive 2002/91/EC of 16 December 2002 on the energy performance of existing buildings, Construction and Housing Code, Articles L. 111-10, L. 131-1, L. 134-1, L. 134-4, L. 271-4 to L. 271-6, R. 131-25 to R. 131-28, draft Order on the energy performance of existing buildings with a surface area greater than 1000 m², where they are undergoing significant refurbishment;
