4. Notification Number

97/297/E

5. Title

Technical specifications for terrestrial TFTS system
stations.

6. Products Concerned

These specifications apply to the equipment used in the
aforementioned stations, en route, intermediate or airport
stations.

7. Notification Under Another Act

-

8. Main Content

The main objective of these technical specifications is to
establish the technical requirements which must be fulfilled
by terrestrial TFTS stations, equipment described in point 6
above and to establish the test methods against which these
requirements must be checked. They are based on ETSI
standards, principally on ETS 300326, and centre on the radio
interface between the mobile station (airship station) and
the terrestrial station.

9. Brief Statement of Grounds

The reason for the present specifications is the need for
minimum technical requirements for this equipment on a

national basis, and to ensure correct usage of the radioelectric spectrum, both in the wavelengths used by this equipment and in any others which may be affected by this usage.
