#### **8. Main Content**

This draft order sets out the criteria which, if met, will allow the operator of a facility falling under heading 2714 or 2791 of the nomenclature of facilities classified for environmental protection under Article R511-9 of the Environmental Code to achieve end-of-waste status for cut wiping cloths made from textiles with waste status.

#### **9. Brief Statement of Grounds**

The draft order aims to terminate the waste status for cut wiping cloths that have been designated as such because of their owners' desire to get rid of used textiles - the material with which the cloths are made.

A positive list of waste that may be used to make cloths is provided in Annex I to the draft order. The waste listed relates to used textiles of any kind which are not dangerous.

The used textiles must have been:

- sorted in order to remove textiles which are damp, dirty or which come from an unauthorised sector,
- cut to size.

Cut wiping cloths must then be identified with a unique number and the recovery facility reference in order to guarantee traceability, particularly in the case of a cross-border transfer.

The operator must also implement a quality management system covering the various management operations for this waste.

Compliance with all of the criteria listed in the order makes it possible to terminate waste status for cut wiping cloths made from used textiles for use as cloths.
