4. Notification Number

2007/0706/F - B30

5. Title

Order on the energy performance of existing buildings with a surface area greater than 1000 m², where they are undergoing significant refurbishment

6. Products Concerned

The products concerned are the components constituting the building shell, heating systems, domestic hot water supply systems, cooling systems, energy supply systems using a renewable energy source, ventilation systems and lighting systems.

7. Notification Under Another Act

d) Other Directive or Regulation: Directive 2002/91/EC of 16 December 2002 on the energy performance of buildings

8. Main Content

The draft Order lays down regulatory requirements that apply to existing buildings with a surface area greater than 1000 m² during renovation works on said buildings costing more than 25% of the value of the building, referred to in Article R. 131-26 of the Construction and Housing Code and provided for in Directive 2002/91/EC of 16 December 2002.

Within this framework, the energy consumption of the building for heating, domestic hot water production, cooling, ventilation and lighting is limited by the maxima laid down in the Order. Minimum requirements also apply to the work carried out in certain areas. Finally, the work must guarantee that the renovated building provides a minimum level of comfort in summer.

9. Brief Statement of Grounds

In the context of the transposition of Directive 2002/91/EC of 16 December 2002 on the energy performance of buildings, the regulatory provisions on the energy performance of existing buildings must be specified. The purpose of the draft Order is to define these regulatory requirements in technical terms. In view of the importance of reducing energy consumption and of limiting the emission of greenhouse gases, it is necessary to establish a regulation ensuring that an increased level of performance is achieved in the case of significant work on a building. The definition of the requirements relating to the energy consumption of the building and to its level of comfort in summer is in line with this objective.

10. Reference Documents - Basic Texts

a) Directive 2002/91/EC of 16 December 2002 on the energy performance of buildings, Construction and Housing Code, Articles L. 111-10, L. 131-1, L. 134-1, L. 134-4, L. 271-4 to L. 271-6, R. 131-25 to R. 131-28
