8. Main Content

a. this departmental advice note describes the repave and remix processes for the hot-mix in situ recycling of wearing course mixtures. it provides guidance on the selection of suitable sites. hot-mix recycling by the repave and remix processes are techniques for rehabilitating deteriorated bitumen-bound pavement surfaces in situ.

b. the united kingdom would like to be informed by other member states of their own standards or regulations offering an equivalent level of safety and security.

9. Brief Statement of Grounds

the development of specialist machinery over the last 15-20 years enables the processes to replace an existing surface in one operation. this technical regulation arises from uk trials to evaluate the performance of the machinery.
