5. Title

Draft Order establishing the calculation methods and hypotheses for the addition of electricity generating plants to the public distribution network.

6. Products Concerned

Electricity

7. Notification Under Another Act

-

8. Main Content

This Order lays down the calculation methods and hypotheses to be carried out by the distribution network administrator in order to determine the conditions for connecting electricity generating plants to this network.

9. Brief Statement of Grounds

Law No 2000-108 of 10 February 2000 opens up the electricity generation market and obliges the distribution network administrator to collect and distribute on their network this form of electricity insofar as the connection does not compromise network operating safety. The technical conditions for this connection are laid down by decree. To ensure fairness in the handling of connection requests, this Order establishes the calculation methods and hypotheses to be carried out by the distribution network administrator.

10. - Law No 2000-108 of 10 February 2000 on the modernisation and development of the public electricity service;

- Draft Decree on technical conditions for the connection of High Voltage Range B to the public distribution network of electricity generating plants. (Notification under way).
