5. Title

mpt 1403 - performance specifications and frequency assignment criteria for analogue and digital fixed radio relay equipment and antennas operating in the frequency bands 12.75 ghz to 13.25 ghz and/or 14.25 ghz to 14.5 ghz

6. Products Concerned

radiocommunications equipment, fixed links.

7. Notification Under Another Act

-

8. Main Content

this specification covers the minimum mandatory requirements of fixed link digital transmitters and receivers for use on private radio link systems in the frequency band 12.75 ghz to 13.25 ghz and 14.25 ghz to 14.5 ghz. these requirements include parameters necessary to ensure compatibility between channels from different sources of equipment on the same route, connected either to separate antennas, or to separate polarisations of the same antenna, and compatibility with the existing radio-relay network.

The united kingdom would like to be informed by other member states of their own standards or regulations offering an equivalent level of safety and security.

9. Brief Statement of Grounds

this is a regulatory document specifying the minimum equipment parameters necessary for frequency assignment in the uk.

there is currently no specific work ongoing within etsi to standardise the use of these bands, due to the diversity of use and equipment across europe. this specification is being

updated to include stm-1 and sub-stm-1 equipment, and therefore now contains elements of stm-1 equipment specifications ets 300 234 and de/tm-04016.
