8. Main Content

This Decree lays down those persons who may make use of the aforementioned quality mark, the common characteristics of the products whose use shall be subject to control, the monitoring of said use and the liabilities inherent to inappropriate usage.

The guidelines indicated by European Standard EN-45011 establishing the criteria with which product certification bodies must comply have been followed in the drafting of this measure. A consultative committee has been set up for this purpose.

9. Brief Statement of Grounds

The regulation of the quality mark seeks to achieve the differentiation, by means of a graphic mark, of those food products possessing a particular quality with the dual purpose of being a tool for those operators seeking to diversify their commercial supply, to bring quality products to the market, and on the other hand, to make food products available to the consumer with a guarantee that they possess certain specific characteristics.
