8. Main Content

The Decree implements Order No 2005-1516 of 8 December 2005 on electronic interactions between public services users and administrative authorities and between administrative authorities. It lays down various measures applicable to administrative authorities intended to guarantee the security of their electronic interactions. The principal measure consists in the creation of a general security referential, which will establish the security rules that administrative authorities must observe when they use security products and trustworthy service providers. This referential will be the subject of an Order which will be notified under Directive 98/34/EC. The Decree also establishes a voluntary qualification procedure for security products and trustworthy service providers to attest to their compliance with the general security referential. To complete this system, a cataloguing procedure is established in order to attest to the compliance of these products and service providers with another referential, the so-called general interoperability referential, which will also be the subject of a notification under Directive 98/34/EC.

Keywords: general security referential, security products, trustworthy service providers, qualification, cataloguing.

9. Brief Statement of Grounds

The objective sought by this Decree is to increase the level of security of the electronic interactions of administrative authorities when processing sensitive data, particularly the personal data of users. The establishment of a general security referential will make it possible to harmonise the levels of security of administrative authorities and will thus facilitate secure interactions between such authorities. Moreover, such a referential will act as a guide for product developers and service providers and will allow the emergence of a range of security products and trustworthy service providers.
