and Supplementary Technical Instructions MI-IP03 and MI-IP04.

**6. Products Concerned**

Installations for the storage of liquids containing oil.

**7. Notification Under Another Act**

-

**8. Main Content**

This concerns the adaptation of the existing Supplementary  
Technical Instructions (ITCs - Spanish designation) IP03 "Oil  
installations for special use " y IP04 "Permanent  
installations for the distribution of oil fuels in

installations for sale to the public" to the legislation laid  
down in article 107 of Law 66/1997 and the law of the  
hydrocarbons sector which indicate that ITCs will fall into

two different categories: on the one hand, those for installations which do not supply fuel to vehicles, and on the other, those which do provide fuel to vehicles.

Standards for the construction and installation of tanks and piping are laid down, indicating, amongst other conditions, the measures to be taken to prevent contamination of the ground on which the installations are placed.

Lays down a preventative servicing and inspection plan intended to spot any anomaly or fault before it occurs.

#### **9. Brief Statement of Grounds**

The draft is drawn up by legal imperative in accordance with the contents of the eighth transitional provision - technical instructions - of article 107 of Law 66/1997, of 30 December, on fiscal, administrative and social measures; and in the third transitional provision - technical instructions - of the law on the hydrocarbons sector.

#### **10. Reference Documents - Basic Texts**
