5. Title

Decision No 04-xxx of the Telecommunications Regulatory Authority of xx/xx/2004 establishing the conditions for use of satellite telecommunications radio installations consisting of earth stations for temporary "SNG" video links

6. Products Concerned

The products concerned are satellite telecommunications radio installations consisting of earth stations for temporary "SNG" video links.

7. Notification Under Another Act

R&TTE Directive 99/5/EC, Article 4(1)

8. Main Content

These decisions lay down the conditions for use of satellite telecommunications radio installations consisting of earth stations for temporary "SNG" video links and authorise the use of frequencies for this equipment. They implement the corresponding standards or harmonised standards published by the European Telecommunications Standards Institute. All recognised equivalent standards are accepted.

9. Brief Statement of Grounds

Earth stations for temporary "SNG" video links are used on a temporary basis for the transmission of news pictures and sound. They operate within the exclusive bands of the fixed satellite service (14-14.25 GHz for uplinks and 12.5-12.75 GHz for downlinks) or within the shared band 10.7-11.7 GHz. They also operate within the shared band 14.25-14.50 GHz on coordinated sites. The earth stations which do not use frequencies specifically assigned to their user are freely established.
