#### 4. Notification Number

2000/521/UK

#### 5. Title

UK Voluntary National Specification 2103 Performance parameters for fixed (point-to-point) terrestrial equipment operating in the 14.25 GHz to 14.5 GHz band

#### 6. Products Concerned

Fixed (point to point) terrestrial radiocommunications equipment.

#### 7. Notification Under Another Act

-

#### 8. Main Content

In the absence of a relevant ETSI standard for this frequency band this specification takes the essential parameters identified in the ETSI Candidate Harmonised Standard (EN 301 751), and supplies relevant numerical limits for these parameters. These limits are taken wherever possible from relevant European documents, and in other cases have been calculated for this specific frequency band. This specification also includes a number of "non-essential parameters", as do the ETSI standards, which are included for reasons of spectrum efficiency and are used in the UK national frequency assignment process. Recognition of equivalent standards is in the notified draft. The following wording is also shown on the cover "98/34/EC Notification Number".

#### 9. Brief Statement of Grounds

To provide a guide to manufacturers as to the parameters and limits that may be required for fixed (point-to-point) terrestrial radio equipment to conform to article 3.2 of the R&TTE Directive, and to additional parameters used in the UK licensing and assignment regime. In the absence of an ETSI standard this specification facilitates access to this band for fixed (point-to-point) terrestrial systems.
