8. Main Content

This Royal Decree seeks to define the necessary rules for practical implementation and procedures for guaranteeing the safety of containers in accordance with the Convention on Safe Containers (C.S.C.), both in terms of their handling and their resistance to blows. These rules are, furthermore, in accordance with the supplement to the Convention itself, which lists the implementing guidelines for each of the states signatory to the Convention.

9. Brief Statement of Grounds

Due to the absence of definitions of structural and safety defects of containers in accordance with the C.S.C, a definition is needed of the procedures for the construction, inspection and monitoring of such containers, with a view to ensuring that there is no danger to persons involved in transport operations in Spain.
