8. Main Content

When manufacturers wish to communicate the environmental impacts of their products, they must submit a declaration, which is accessible to all, for consultation and in which the indicators have been calculated according to an established methodology.

The impacts in question are those relating to the lifecycle of the product: consumption of resources, whether solid waste is recovered or disposed of, climate change, atmospheric acidification, air or water pollution, the formation of photochemical ozone and eutrophication.

The communication format is not prescribed (i.e. labelling, display, etc.). The manufacturers are not obliged to communicate these indicators, but must accept the methodological format of the decree if deciding to do so.

9. Brief Statement of Grounds

The decree sets out a single procedure for all parties concerned, based on the experience of standardisation and established practice. This ensures transparent, unbiased information.
