8. Main Content

The draft technical rule is intended to modify the Order of 24 December 2001 relating to terrestrial digital video broadcasting establishing the characteristics of the signals emitted pursuant to Article 12 of Law No. 86-1067 of 30 September 1986 on freedom of communication.

The modifications relate to three points.

They then impose the use of the MPEG-4 standard for encoding all terrestrial digital television services broadcast overseas, while the provisions currently in force in mainland France in essence remain unchanged. Finally, they provide for the use of the MPEG-2 standard for encoding at least one sound component of free-to-air services broadcast in standard format throughout the territory of the Republic.

They intend to exclude from the scope of the Order mobile television services, for which the characteristics of the signals emitted are established by the Order of 24 September 2007.

9. Brief Statement of Grounds

Within the context of the switchover to digital video broadcasting overseas, this Order seeks to introduce as efficient a use of the radio spectrum as possible, taking into account recent technological developments. Furthermore, it goes on to coordinate the various texts laying down the characteristics of the signals emitted.
