5. Title

Draft Order establishing the method for taking samples from the carcasses of Iberian pigs and the analytical method for determining the composition of fatty acids from the total lipids in the subcutaneous adipose tissue of the carcasses of Iberian pigs.

6. Products Concerned

Carcasses of Iberian pigs (Taking of samples) Subcutaneous adipose tissue of Iberian pigs (Method of analysis for determining the composition of fatty acids from lipids).

7. Notification Under Another Act

-

8. Main Content

1. The notified Draft Order contains the official method for taking samples from the carcasses of Iberian pigs as well as the official analytical method for determining the composition of fatty acids from the total lipids in the subcutaneous adipose tissue of Iberian pigs.

9. Brief Statement of Grounds

Royal Decree No 1083/2001 (Notification No 2000/020/E), amended by Royal Decree No 144/2003 (Notification No 2002/380/E) adopts the Quality Standard for Iberian ham, shoulder and cured loin produced in Spain, with the adoption of specific procedures to comply with the conditions laid down in this standard being necessary. The feed consumed by pigs during their rearing and fattening determines, to a large extent, the composition of fat deposited in their tissues (adipose and muscular). For this reason it is necessary to establish the official method for the taking of subcutaneous adipose tissue samples from Iberian pigs as well as the method of analysis for subsequently determining the composition of fatty acids from the total lipids in this tissue.
