**4. Notification Number**

96/0021/F

**5. Title**

SP/DGPT/ATAS/33 : technical regulation applicable to terminal equipment for microwave systems intended for low-capacity numeric transmission in the 1.5 GHz band

**6. Products Concerned**

The equipment in question comprises microwave systems which are used by independent radio networks for the transmission of numeric signals functioning in the 1375 GHz to 1400 GHz frequency band and the 1427 GHz to 1452 GHz frequency band.

**7. Notification Under Another Act**

-

**8. Main Content**

This approval specification covers microwave systems which are used in the 1.5 GHz range.

**9. Brief Statement of Grounds**

The notification of this draft is justified by reason of the proper use of the radio spectrum. The results of tests carried out in laboratories specified by the other Member States, in accordance with article R20-18 of decree no.92116 of 4 February 1992 relating to the approval of telecommunication terminal equipment, the conditions for connection thereof and the admittance of installation engineers, are recognized as being valid.

In accordance with the position of the French authorities on the regulation of radio receivers, given in the context of the response to the detailed opinion issued by the Commission regarding draft 95/203/F (technical regulation applicable to terminal equipment for plesiochronous microwave systems in the 13 GHz band (SP/DGPT/ATAS/30)), manufacturers have the possibility of producing, for receivers, a declaration of conformity with the requirements specified in the corresponding chapter (see chapter 2 "method of providing proof").
