8. Main Content

The primary purpose of the draft regulations is to implement article 11 of Regulation (EC) No 715/2007. This requires Member States to prohibit the sale or installation of new replacement pollution control devices intended to be fitted to vehicles approved under the Regulation unless they have been type approved in accordance with the Regulation and its implementing measures. The Regulation also requires Member States to prohibit the sale or installation of such devices for vehicles type approved to emissions standards preceding the Regulation unless these devices have been type approved to similar standards.

To this end the draft Regulations require that these replacements are marked and are accompanied by information in accordance with the Regulation and its implementing measures or with Directive 98/77EEC, as amended by directive 2002/80/EC.

9. Brief Statement of Grounds

The draft Regulations, for the purposes of implementing article 11, prevent the sale and installation of non type-approved replacement devices for certain vehicles. Since those devices may still lawfully be sold for other sorts of vehicles, in order to ensure proper enforcement and hence achieve the intended environmental benefits of article 11, regulation 8 of the draft Regulations requires those non-type approved devices to be marked or labelled in a way which makes it clear that they may not be supplied for those vehicles in respect of which it will be unlawful to fit non-type approved devices. They must also be accompanied by specified information.
