5. Title

Draft order amending the order of 26 October 1984 on
liquefied petroleum gas cylinders.

6. Products Concerned

Liquefied petroleum gas cylinders.

7. Notification Under Another Act

-

8. Main Content

This amending order aims at relaxing the regulations which
allow certain batches of liquefied petroleum gas cylinders to
undergo the periodic tests only every 15 years, with
statistical monitoring of their aging by periodic explosion
tests carried out on samples.

9. Brief Statement of Grounds

In the light of the experience acquired over more than 25
years, it has appeared possible to apply the special 15-year
test procedure to batches of cylinders which have undergone
explosion tests on samples after manufacture, and then during
the seventh and fourteenth calendar years after the year of
the first test, these tests being subsequently repeated with
the same frequency for each 15-year period. Previously the
explosion tests were required every 5 years.
