5. Title

Draft Royal Decree on fertiliser products

6. Products Concerned

This Regulation also includes organic fertilisers, soil conditioners and other products.

7. Notification Under Another Act

-

8. Main Content

To lay down basic standards for fertiliser products, implement and update the existing national legislation therefor and specify some of the provisions in Regulation (EC) No 2003/2003 relating to fertilisers, whose implementation and development have been entrusted to the Members States and to introduce regulations on new types of fertilisers and standards necessary for coordination with the autonomous communities.

9. Brief Statement of Grounds

The potential impact to human health and safety and the environment from new products containing nutrients for plants and fertilizing capacity cannot be ignored. Therefore, it is necessary to regulate the use of new ingredients in the manufacture of fertiliser products to avert any harmful impact to water, soil, flora, fauna and humans, provided its agronomic effectiveness has been demonstrated.

This regulates the Fertiliser Products Register for registration of certain products and updates the procedure for registration in the Fertiliser Products Register.
