8. Main Content

There is currently no European harmonised standard for the frequency band covered by this Voluntary National Standard (VNS). This VNS has drawn upon existing or (draft) harmonised standards for similar services in similar frequency bands and taken appropriate parameters that have been identified in the UK

9. Brief Statement of Grounds

It is required by the Wireless Telegraphy Act 1949 that no radio equipment is installed or used in the UK except under the authority of a licence granted by or otherwise exempted by regulations made by the Secretary of State. It is a condition of such a licence or exemption regulations as appropriate that the equipment must meet the minimum requirements specified in the R&TTE Directive and must operate in UK spectrum according to the spectrum usage parameters of IR2007. This document gives no presumption of conformity to the R&TTE Directive but reflects what the Radiocommunications Agency considers manufacturers could do to comply with it.
