8. Main Content

The purpose of the regulation in question is to regulate the procedure for the granting of direct subsidies under the "Plan for Promoting Sustainable Mobility with Alternative Energy Vehicles (MOVEA)", consisting of incentivising the purchase in Spain of vehicles powered by alternative energy sources to conventional fuels, and for the granting of aid for the implementation of electric vehicle charging stations in publicly accessible areas in Spain, thereby promoting sustainability in the transport sector, reducing emissions of CO₂ and other pollutants, mitigating climate change and improving air quality, as well as promoting a diversification of energy sources in transport and a reduction in oil energy dependence.

To this end, the subsidies to which the regulation applies shall be granted for the purchase in Spain of vehicles powered by alternative energies (electricity, LPG, CNG, LNG) and for the installation of electric vehicle charging

stations in public access areas.

9. Brief Statement of Grounds

It is considered necessary to notify the European Commission of the draft Royal Decree regulating the direct granting of aid for the purchase of alternative energy vehicles and for the implementation of electric vehicle charging stations in 2016 (MOVEA), since it is a financial measure considered as a de facto technical regulation, and is included under the definition of technical regulation per Article 1(f) of Directive (EU) 2015/1535 of the European Parliament and of the Council of 9 September 2015 laying down a procedure for the provision of information in the field of technical regulations and of rules on Information Society services (formerly Directive 98/34/EC). Since it is considered a financial measure, it is exempt from meeting the standard deadline of three months imposed by Article 6(1) of said Directive.
