4. Notification Number

2016/0223/E - B30

5. Title

Draft order regulating the procedures for determining the emissions of atmospheric pollutants SO₂, NO_x, dust and CO from large combustion plants, the inspection of measuring instruments and the handling and referral of information related to these emissions.

6. Products Concerned

Determining the emissions of atmospheric pollutants.

7. Notification Under Another Act

-

8. Main Content

The purpose of the order is the regulation of the procedures for determining, in plants firing gaseous fuels, the emissions of atmospheric pollutants SO₂, NO_x, dust emissions from large combustion plants (LCP) and CO, as well as the inspection of measuring instruments and the handling and referral of information related to these emissions.

All measures both of pollutant emissions and of process parameters are conducted according to UNE/EN standards.

The installed measuring instruments are compliant with the applicable UNE/EN standards, and are subject to supervision by the competent administration.

In LCP centres that require supervision, emissions will be continuously measured, and one discontinuous measurement of the emissions will be made for those LCPs that are not obliged to continuously measure their emissions. The measurements will be made in accordance with the guidelines provided in Part 3 of Annex 3.

LCP owners will provide data on these centres to the Competent Administration, who will transfer the data collected to the European Commission.

9. Brief Statement of Grounds

Article 72(3) of Directive 2010/75/EU specifies that an annual inventory of the sulphur dioxide, nitrogen oxides and dust emissions of all combustion plants will be established on 1 January 2016. For this purpose, the measurement, inspection and evaluation of emissions into the atmosphere of the pollutants mentioned is necessary, as well as carbon monoxide, when required. However, an inventory is not required for these emissions, as these plants are adequately regulated in order to obtain homogeneous and comparable emission

data.

10. Reference Documents - Basic Texts

No basic text(s) available.

11. Invocation of the Emergency Procedure

No

12. Grounds for the Emergency

-

13. Confidentiality

No

14. Fiscal measures

No

15. Impact assessment

-

16. TBT and SPS aspects

TBT aspect

No - the draft has no significant impact on international trade.

SPS aspect

No - the draft has no significant impact on international trade.
