6. Products Concerned

Laevorotatory tryptophan (L-tryptophan)-containing food supplements and L-tryptophan-containing foods for particular nutritional use.

7. Notification Under Another Act

-

8. Main Content

These draft Regulations consolidate, with amendments, the Tryptophan in Food Regulations 1990, as amended, in relation to Scotland. They continue to prohibit the addition of tryptophan to food, and the sale, offer for sale and exposure for sale of food containing tryptophan, subject to exemptions.

These draft Regulations allow the addition of a new exemption from the prohibitions of the original Regulations in respect of L-tryptophan added to food supplements if certain conditions are met with regard to purity and recommended daily dose.

The draft Regulations include the insertion of a qualification to the existing exemption in respect of L-tryptophan or its salts added to foods for a particular nutritional use in that the added substance must comply with specific purity criteria.

The UK will fulfil its obligation under article 12 of Directive 98/43/EC when these Regulations, and parallel Regulations to be made in England, Northern Ireland and Wales are officially published.

Keywords: Tryptophan, food supplements, PARNUTS.

9. Brief Statement of Grounds

The Committee for the Toxicology of Chemicals in Food, Consumer Products and the Environment (COT) recently considered up-to-date evidence on tryptophan and concluded that L-tryptophan as a dietary (food) supplement, would not present an appreciable risk to health provided that it met the purity criteria specified in the European Pharmacopoeia (EP) and that the maximum recommended intake for an adult was 220mg/day.

Given COT's conclusions, there is a case for introducing a requirement that where L-tryptophan (or any of its salts) is added to infant formulas, follow-on formulas, processed cereal based baby foods and baby foods intended for infants and young children or other foods for particular nutritional uses, it should also, in these cases, comply with EP purity criteria.
