4. Notification Number

95/0161/E

5. Title

Ministerial Order establishing the criteria for carrying out
the production control of concretes produced in concrete
mixing plants.

6. Products Concerned

Ready-mixed concrete produced in a concrete mixing plant.

7. Notification Under Another Act

3823.50.10

8. Main Content

To establish the criteria for carrying out the production
control, at the plant, of ready-mixed concretes produced in a
concrete mixing plant.
Said production control encompasses the control of raw
materials and their storage, control of the installations and
equipment, control of the concrete and control of the
documentation.

9. Brief Statement of Grounds

The current regulation of the subject covered by the draft is contained in article 2 of Royal Decree 1280/1976 of 9 April and in circular 1/77 of the State Office for Mining and Construction Industries on 'Self-control of quality in the production of ready-mixed concrete' which have become outdated.

The applicable regulation for the draft and the construction of structures using bulk and reinforced concrete (EH 91) approved by means of Royal Decree 1039/1991 of 28 June stipulates in article 15 thereof that the carrying out of the production control of concretes, at the plant, is obligatory, but does not establish and therefore update the corresponding criteria for performing this control.

Therefore, given the increase in production of concretes produced in concrete mixing plants, it is considered necessary to update and specify the criteria for carrying out said production control.
