8. Main Content

1. The aim of the regulation "IC Standard 6.3 on road resurfacing", is to lay down the criteria allowing the appropriate solution for resurfacing a road to be chosen and planned. In order to do this, the planner is provided with a procedure for assessing and analysing the state of a road surface and a range of possible resurfacing solutions, from which they must choose the most appropriate.

9. Brief Statement of Grounds

The main purpose of the regulation is to update the standard adopted by the Order of 26 March 1980 to bring it into line with technical developments, changes in the volume and composition of traffic, the current state of Spanish roads, technological advances in materials and construction systems, and the need to incorporate inspection, sounding and sizing systems into rigid and semirigid road resurfacing.
