5. Title

Technical specifications for the network termination point (ntp) of the switched telephone network (stn) and minimum requirements for connection to private subscriber exchanges.

6. Products Concerned

The network termination point (ntp) is the physical component of the switched telephone network (stn) where each telephone service supply line terminates and to which the private subscriber exchange is connected.

7. Notification Under Another Act

-

8. Main Content

The main aim of these technical specifications is to set the technical requirements which should be fulfilled by the ntp of the stn, as well as to set the minimum requirements which must be fulfilled by the private exchange for this to be connected, via the ntp, to the stn.

9. Brief Statement of Grounds

The justification for these present technical specifications is to standardize a single ntp model nationwide, as well as to ensure that the private exchange is set up so as to guarantee the performance of the basic telephone service.
